Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 26 April 2004.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Schuler (USPN 6,443,030).

Schuler discloses a vehicle steering wheel comprising: a hub (3), a steering wheel rim (5), and at least one spoke (7) having at least one spoke section, a skeleton (17) for said steering wheel rim and said spoke, said skeleton being interrupted in a radial direction between said spoke section and said steering wheel rim to define radial inner and radial outer skeleton parts separated and distanced from each other so that immediate force transmission in a radial direction within said skeleton is interrupted, and a vibration-decoupling means (21 and 23) bridging a distance between said skeleton parts and attaching said skeleton parts to each other, said vibration-decoupling means acting in all directions and at least largely isolating said steering wheel rim in terms of vibrations from said at least one section of said spoke;

said vibration-decoupling means is provided at a transition point of said spoke to said steering wheel rim;

said vibration-decoupling means is provided inside said spoke and separates spoke sections from each other in terms of vibrations (see fig. 5);

said vibration-decoupling means is formed by a bearing.

Allowable Subject Matter

3. Claim 7 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claim 13 is allowed.

Response to Arguments

5. Applicant's arguments filed April 26, 2004 have been fully considered, but they are not persuasive. The Schuler reference reads on the claims as amended. In Fig. 5 of Schuler, the legs of the U-shaped skeleton 21 are interrupted by the additional mass 23 in a radial direction. At the intersection of the U-shaped portion 21 and the spoke 7, the innermost leg of the U-shaped skeleton acts as a skeleton for the spoke 7, and the outermost leg of the U-shaped portion acts as the skeleton for the rim. The skeletons are interrupted radially relative to the hub and the rim at the intersection shown in Fig. 5.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 3682

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
